BORROWER-BASED MEASURES

Compliance with LTV-O Limits for New Residential Real Estate Loans

8. A lender shall ensure that the LTV-O ratio of an RRE for Category I Borrowers shall not exceed the 90 per cent LTV-O.

Provided that, the total volume of RRE loans granted to Category I Borrowers with an LTV-O beyond the 90 per cent threshold, does not exceed 10 per cent of the total volume of RRE loans granted to Category I Borrowers on a semi-annual basis.

9. A lender shall ensure that the LTV-O ratio of an RRE loan for Category II Borrowers shall not exceed 85 per cent in the first year of the coming into force of this Directive and 75 per cent in the years thereafter.

Provided that, the total volume of RRE loans granted to Category II Borrowers with an LTV-O beyond that set in this paragraph shall not exceed 20 per cent of the total volume of RRE loans provided on a semi-annual basis.

10. Lenders shall follow established prudent credit risk management practices when exercising the speed limits.
11. For the purposes of calculating the LTV-O, lenders shall determine the collateral value in a prudent and conservative manner in accordance with paragraphs 11, 12, 13 and 14 of the [MFSA Banking Rule on the Measures addressing credit risks arising from the assessment of the quality of asset portfolios of credit institutions authorised under the Banking Act 1994 \(BR/09/2016\)](#).
12. In calculating the LTV-O, only the RRE backing the loan should be considered.

Without prejudice to the above provision, additional collateral (financial and non-financial) shall be requested by the lender when the speed limit is exercised.

Provided that, such additional collateral shall be in accordance with the internal policies of the lender.

Compliance with DSTI-O Limits for New Residential Real Estate Loans

13. A lender shall assess the ability of the borrower/s to service the RRE loan by applying a stressed DSTI-O of 40 per cent limit, subject to an interest rate shock of 150 basis points for both Category I and Category II Borrowers.

The interest rate shock shall be reviewed subject to market conditions.

The stressed DSTI-O shall be calculated as follows:

$$\text{DSTI-O}_{\text{stressed}} = \frac{(\text{Annual total debt service} | \Delta r_{\text{stressed}})}{\text{Gross Income}}$$

$$\Delta r_{\text{stressed}} = +150 \text{ bp}$$

14. A lender shall identify the total amount of the debt servicing of the borrower/s when applying the affordability test as stipulated in paragraph 13.

Compliance with Maturity Limits on All New Residential Real Estate Loans

15. The maturity term at origination of an RRE loan granted to Category I Borrowers shall not exceed the horizon of 40 years or the official retirement age, whichever occurs first.
